WORK EXPERIENCE

Harmony Healthcare IT

April 2025- Current

Senior Software Engineer and Dev Lead

Remote

- Leader of the **Core team**, a team of three high-performing engineers, balancing **feature development** and **development support** across the full suite of company products, spanning multiple technologies and stacks.
- Oversee all stages of **product development** from MVP to production, with a focus on building reliable, maintainable systems within a **Service-Oriented Architecture**.
- Lead **technical investigations (spikes)** to de-risk unknowns and contribute **architectural direction** based on comprehensive understanding of product capabilities and long-term goals.

Harmony Healthcare IT

Feb 2024 – May 2025

Software Engineer

Remote

- Wide variety of **systems** and **architecture** including frontend and backend software development, **database management**, **cloud engineering**, and **DevOps** automation
- Maintain several **RabbitMQ** microservices, built with **Java**, **Kotlin**, and **Spring**.
- Feature development and maintenance for **AngularJS** application with **Java/Kotlin Spring Boot** backend.
- Excel in triaging high priority issues, providing root cause analysis, and writing up defects in JIRA.

AmeriSave Mortgage Corporation

Feb 2022 – Oct 2023

Software Engineer II

Remote

- Develop and maintain **RESTful APIs** across distributed systems using **Java**, **Spring Boot**, **TypeScript** (**NestJS**, **Fastify**), and **MSSQL**.
- Modernize monolithic **ColdFusion** applications and complex **stored procedures** by extracting business logic into **scalable microservices**.
- Own key applications, including a business-critical internal rate tool and customer-facing applicant portal
- Co-led development of applicant portal (**Vue/Quasar SPA** with **Spring Boot** backend), notably leading effort to switch from **Firebase** to **Auth0**.
